🎓 EDUCATION

University of Ilorin, Ilorin — B.Sc *Information Technology*

2021 - 2025.

💻 EXPERIENCE/PROJECTS

Deebo | Frontend *Developer*

August 2025- till date

- Led the frontend development of the MVP, transforming detailed Figma designs into a responsive, high-performing web interface.
- Collaborated closely with the product manager to define core features, refine user flows, and ensure alignment between design, functionality, and business goals.
- Integrated Korapay payment gateway to support secure and seamless event-related transactions.
- Developed key platform functionalities, including cart management, multi-step event creation flows, and dynamic content rendering.
- Worked alongside backend engineers to connect and optimize RESTful API endpoints, ensuring robust data handling and consistent user experience.
- Focused on building a scalable, maintainable frontend architecture, improving development efficiency and platform reliability.

EngageAm | Frontend *Developer*

December 2024- July 2025

- Developed and maintained a user engagement platform that enables users to earn and spend points by interacting with each other's social media posts (likes, comments, etc.).
- Implemented a Monnify-based payment integration for purchasing engagement points, enabling seamless transactions and revenue generation.
- Built real-time analytics dashboards, allowing users to monitor who engaged with their posts and track their performance.
- Created a dispute and flagging system that enables users to report suspicious or false engagements, improving platform trust and fairness.
- Collaborated closely with cross-functional teams to ensure scalable frontend architecture and smooth user experience.
- Contributed to a product now serving over 5,000 users, ensuring stability and responsiveness under growing usage.

Cimpla Africa | Frontend *Developer Intern*

May 2024- November 2024

- Built and launched a fully responsive company website using React and TailwindCSS, increasing visitor engagement and improving product visibility.
- Designed and implemented a waitlist landing page that successfully captured leads and stored user data securely in the database.
- Co-developed a core product dashboard with real-time data integration, enabling better monitoring and decision-making for internal stakeholders.
- Streamlined team collaboration through Git/GitHub and Google Meet, reducing development bottlenecks and improving feature delivery speed.
- Played a key role in integrating clean UI components and improving cross-device responsiveness, resulting in positive user feedback.

Credit Direct Finance Limited | Frontend Developer Intern

June 2024 - September 2024

- Built a “Log a Ticket” feature for a financial application, streamlining user support and improving issue resolution tracking.
- Worked closely with product and business teams to implement feedback-driven enhancements and deliver timely bug fixes.
- Actively participated in Agile meetings including daily stand-ups, sprint planning, and code reviews, contributing to team efficiency and knowledge sharing.
- Used Git and GitHub for source control and collaborated effectively via Microsoft Teams and Jira to ensure timely task delivery.
- Helped develop an enterprise platform by building core user workflows, integrating RESTful APIs, and collaborating with QA to meet product specifications and quality standards.

Blue Devtech Solutions | Frontend Developer Intern

Sept 2023- Nov 2023

- Developed and optimized responsive UI components using React and TailwindCSS, improving user engagement and visual consistency across devices.
- Integrated backend APIs and third-party libraries to enhance data flow, app functionality, and user interaction.
- Collaborated with team members via Google Meet and Trello, reducing miscommunication and boosting sprint velocity.
- Used Git and GitHub for version control, ensuring smooth collaboration and delivery of production-ready features.

SKILLS**Technologies:** HTML, CSS, SASS, Tailwind, JavaScript, TypeScript, React.js, Next.js, Redux Toolkit, React Native, Node.js, Express, and MongoDB.**OS/Tools:** Vscode, Git and GitHub, Firebase, Postman, Swagger.**Soft Skills:** Efficient communication, debugging ability, detail-oriented, googling/research ability.
