PROFILE

As an enthusiastic front-end developer, I bring a passion for learning, vital creative and analytical skills, and a meticulous eye for detail. I thrive as a team player, fostering effective collaboration in project environments. Committed to staying current with technology, I'm eager to embrace new challenges, delivering seamless, visually appealing websites and driving digital innovation with dedication and expertise.

WORK EXPERIENCE

Frontend Developer Intern

Blue Dev Solutions   August - October 2023

- Actively collaborated with project management, design, frontend and backend teams to develop web applications, focusing on frontend development. Key contributions includes building the user interface and functionalities, intergrating API from the backend into the applications and working with third party libraries.
- The use of Project management tool like Trello and effectively worked on assigned project tasks, and deadlines given..
- Leveraged Git and GitHub for seamless collaboration, code contributions, and project repository management. Ensured version control and facilitated the smooth development and deployment of project features.
- Participated in virtual meetings via Google Meet to facilitate communication, support, and problem-solving among team members.

Frontend Developer Intern

HNG - Ingressive for Good   October - December 2022

- Improved tools to boost user interaction and deliver design versatility.
- Collaborated seamlessly with project managers, sales, and design teams in a fast-paced, deadline-driven environment.
- Elevated team communication by implementing technologies such as Slack and Google Meet for daily updates and discussions.
- Actively utilized Git and GitHub for code version control and collaborated with team members by pushing code changes, and ensuring code quality, and functionality
